DIFFERENT TYPES OF SURROUNDS

PYLON & KIOSK

PYLON & TOTEM

3D CHANNEL LETTERS

We are specialized in fabrication of Aluminium/Acrylic/Zincore/Stainless steel built up letters comprising of non-illuminated & illuminated letters with energy efficient & long lasting LED lighting system.

FLEX FACE SIGN

ARC team undertakes flex fascia sign manufacturing with specially made extruded rust proof anodised aluminium profiles. Flex fascia made of 3M Panaflex, 3M Panagraphics, European, Far Eastern, Korean & Chinese are used with vinyl application or printing depending on the customer requirement. Homogenous and high brightness lighting shall be achieved inside the same using Fluorescent, LED tubes & LED lighting.

VEHICLE BRANDING

Vehicle wraps are the most impactful way to create a buzz for your advertising message on the roads. Vehicle graphics when done properly are one of the most effective forms of advertising your products. ARC Advertising have the capabilities of branding small passenger cars, trucks, merchandising vans, buses and trailers. Vehicle wraps are accomplished by professional applicators, using high-quality and UV laminated vinyl graphics.

WALL BRANDING

Nothing communicates your message faster than a crispy, clear and powerful image. Our digital imaging technology gives you fast, affordable, photo-realistic images that will catch eyes and turn heads. We bring your business into focus with our cost effective digital imaging solutions. We execute digital printing projects using latest machines with high resolution graphics of superior print quality posters, backlit signage, wall murals, point of sale displays, fine art reproduction, vehicle graphics, stickers and much more.

ALUMINUM CLADDING WORKS

We are experts in aluminium composite cladding which is basically a typical metal curtain wall system. It is constructed out of light weight aluminum composite panels, applications include exterior cladding, column covers, infill panels, fascias, canopies, interior wall, partition panels, equipment enclosures, beam wraps, trim accents, soffits and sun shades.

STRUCTURAL GLAZING

Structural glazing is a system of bonding glass to aluminium window frame using high strength, high performance silicone sealant. The adhesive qualities of silicone sealants helps to retain the glass in the frame, without the necessity of any mechanical retention such as beads, clips or fixtures. Structural glazing with sealant allows perfectly uniform large glazed surfaces, uninterrupted by frames and supporting systems, with special fixtures and fittings.
